TR4 Express run 2024/11/17

Testing Prestashop homepage usability, checking if it\'s user-friendly, and that all navigation elements (links, menus, banners, etc.) are accessible and lead to the correct destinations in the newest versions of Microsoft Edge and Google Chrome. It will also assess the responsiveness and accessibility of the homepage across different screen sizes.

Prestashop Demo Environment -- Usability testing

Steps

Step	1
Action	Navigate to the homepage of the site in the browser.
Expected result	The homepage loads fully, with no errors or broken images. It should display the main menu, featured products, banners, footer, and the search bar.
Actual result	The homepage loads fully, with no errors or broken images. It displays the main menu, featured products, banners, footer, and the search bar.
Status	Passed
Step	2
Action	Click on each category link in the main menu ("Clothes", "Accessories", "Art").
Expected result	Each category should load the correct page with the expected product list or category content. There should be no errors or 404 pages. All links should be functional and redirect to the appropriate pages.
Actual result	Each category loads the correct page with the expected product list or category content. There are no errors or 404 pages. All links are functional and redirect to the appropriate pages.
Status	Passed
Step	3
Action	Scroll down to the footer and click on links such as "Contact Us" and "Terms and conditions of use".
Expected result	Footer links should lead to the correct pages without any broken links. The pages should load promptly and display the appropriate content.
Actual result	Footer links lead to the correct pages without any broken links. The pages load promptly and display the appropriate content.
Status	Passed
Step	4
Action	Click on one or more featured products displayed on the homepage.

Expected result	The product detail page should load correctly, showing the relevant product information (e.g., price, description, product details, images, and "Add to Cart" & "Add to Wishlist buttons). There should be no broken images or missing content.
Actual result	The product detail page loads correctly, showing the relevant product information. There are no broken images or missing content.
Status	Passed
Step	5
Action	Click on any promotional banners or sliders located on the homepage.
Expected result	The linked page should load and display content relevant to the promotion (e.g., discounts, sales pages). The banner should redirect to the correct page without errors.
Actual result	The linked page loads and displays content relevant to the promotion. The banner redirects to the correct page without errors.
Status	Passed
Step	6
Action	Enter a product name or keyword into the search bar and press "Enter."
Expected result	The search results should display relevant products or categories based on the search term. If no results are found, a friendly "no results" message should be shown. The results should load without significant delays.
Actual result	The search results display relevant products or categories based on the search term. If no results are found, recommended products are shown. The results load without significant delays.
Status	Passed
Step	7
Action	Test the homepage on multiple screen sizes (e.g., desktop, tablet, and mobile). This can be done using function in the homepage header or developer tools.
Expected result	The homepage should be responsive, with all elements adjusting to fit the screen size. The navigation, images, and text should be clear, and clickable elements should be appropriately sized for mobile use. No layout or functionality issues should occur.
Actual result	The homepage is responsive, with all elements adjusting to fit the screen size. The navigation, images, and text are clear, and clickable elements are appropriately sized for mobile use. No layout or functionality issues occur.
Status	Passed
